### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Drawings***

1. Figures 3 and 4 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claim 1 rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant Admitted Prior Art (AAPA) in view of Kiichiro (2003-329143).

Re claim 1. AAPA discloses in figure 3, A sealing device comprising: an annular member disposed in an annular hole (102), movable in an axial direction, and including a radial section (100a) and an axial section (110) extending in the axial direction from at least one of an inner end and an outer end of the radial section, and a sealing body including a sealing lip (112) disposed over the radial section and the axial section of the

annular member and hermetically abutting on a periphery of the annular hole. AAPA does not disclose the sealing device sealing one side and the other side of the annular member in the axial direction, wherein: a stepped section with thinner wall is provided to the axial section adjacent to a root of the sealing lip; and an end section of the sealing body is disposed to the stepped section. Kiichiro discloses figure 1, the sealing device sealing one side and the other side of the annular member in the axial direction, wherein: a stepped section with thinner wall is provided to the axial section adjacent to a root (12a) of the sealing lip; and an end section of the sealing body is disposed to the stepped section. It would have been obvious to one of ordinary skill in the art at the time of the invention to combine the teaching of the Applicant Admitted Prior Art to that of Kiichiro to form a seal lip with high pressure resistance and durability.
